* * SUMMARY PARAGRAPHS EXPLAINING CLIENT'S ATTAINED SCALE SCORES * *

TRUTHFULNESS SCALE: MEDIUM RISK RANGE RISK PERCENTILE:47
This person's response pattern on the Truthfulness Scale is in the Medium Risk (40 to 69th percentile) range. The DVI-J profile is accurate. However, there is a tendency for this person to deny common problems and to portray self in an overly favorable light. This person has adequate reading skills and appears to have answered DVI-J test items reasonably accurately. Specific questions will usually be answered more accurately than open-ended or general questions. This is a accurate DVI-J profile and other scale scores are accurate.

ALCOHOL SCALE: PROBLEM RISK RANGE RISK PERCENTILE:81
This person's response pattern on the Alcohol Scale is in the Problem Risk (70 to 89th percentile) range. Alcohol use and abuse is indicated. Alcohol abuse may be a focal issue in this person's adjustment problems. Either this person is a recovering alcoholic, or an established pattern of alcohol abuse is indicated. RECOMMENDATIONS: Consideration might be given to moderately intensive probation including personal reporting. Individual or group counseling and/or Alcoholics Anonymous (AA) participation on at least a weekly basis could be helpful. A firm probationary structure with a counseling or self-help component is desirable.

CONTROL SCALE: LOW RISK RANGE RISK PERCENTILE:39
This person's score is in the Low Risk (zero to 39th percentile) range. Low Risk scorers typically do not have serious control problems or concerns. Within the field of domestic violence the term "control" refers to a "self-control through control of others" continuum. Loss of self-control can be controlling and is often manifest in emotional, verbal and physical abuse. In other words, loss of self-control can be intimidating, manipulative and influential in controlling others. Loss of control can involve swearing, hitting and severe physical violence. This individual scored in the Low Risk range.

DRUGS SCALE: MEDIUM RISK RANGE RISK PERCENTILE:56
This person's response pattern on the Drugs Scale is in the Medium Risk (40 to 69th percentile) range. Some indicators of drug use or abuse are present. Although an established pattern of drug abuse is not evident, tendencies or a "proneness" towards drug use or abuse are present. RECOMMENDATIONS: With regard to drugs, a low to moderate intensity probationary response might be considered. Participation in a drug-related educational program and/or attendance at Narcotics Anonymous (NA) or Cocaine Anonymous (CA) meetings would be desirable.

VIOLENCE SCALE: PROBLEM RISK RANGE RISK PERCENTILE:71
This person's response pattern on the Violence Scale is in the Problem Risk (70 to 89th percentile) range. Problem Risk scorers are capable of committing acts of physical, emotional or verbal abuse. They frequently have communication difficulties and family/relationship problems. Many harbor a lot of poorly repressed resentment, anger and even hostility. RECOMMENDATIONS: Structure characterized by clearly understood behavioral expectations and consequences should be considered, along with close supervision. When upset (or during periods of substance abuse), this person's emotions all to easily interfere

with his or her judgment. Family or domestic violence counseling or anger management program involvement is needed. When under perceived stress this individual could be assaultive and potentially dangerous.

STRESS COPING SCALE: PROBLEM RISK RANGE RISK PERCENTILE:83

This person's response pattern on the Stress Coping Abilities Scale is in the Problem Risk (70 to 89th percentile) range. Problem risk scorers are not coping effectively with the stress, tension, anxiety and pressure. Symptoms of stress include irritability, depression, anxiety, substance abuse and marital/family problems. RECOMMENDATIONS: Stress management counseling would be helpful. This person should adjust his or her lifestyle to incorporate adequate sleep, nutrition, regular exercise and enjoyable leisure time.

SIGNIFICANT ITEMS: The following self-report responses represent direct admissions or unusual answers.

ALCOHOL

- 17. Drinks too much
- 42. Has asked for help
- 51. Admits drinking problem

DRUGS

- 9. Family + social problems
- 64. Gone for drug help

DOMESTIC VIOLENCE

- ** 2 domestic violence arrests
- ** 2 assault arrests
- 45. Physically hurt others

CONTROL

- 54. Wants to be in charge
- 63. Often controls others

TREATMENT NEEDS (PROGRAMS) SELECTED

- 137. Narcotics Anonymous

STRUCTURED INTERVIEW: These answers, with all of their biases, are the answers selected by the client.

- 141. Temper problem: slight
- 142. Drinking problem: moderate
- 143. Drug problem: slight
- 144. D.V. problem: slight
- 145. Alcohol treatment: not sure
- 146. Drug treatment: may need
- 147. D.V. counseling: not sure
- 148. Mental health problems
- 149. Past year: not dangerous
